

MicroMD® PM Patient Registration

Effortless Management of Comprehensive Patient Information

With MicroMD PM, medical practices manage large volumes of registration, encounter, lab, and other types of data with ease. From referrals to prescription histories to medical alert information, the system provides a complete picture of each patient with fast access to the functions you use most frequently.

Just one of many advanced features, in MicroMD PM you can create multiple medical cases for a single patient. The "Cases" function lets your practice track chronic diagnoses, injuries, and other incident-related information. By linking cases to primary insurances, you can ensure that claims are filed properly and efficiently.

CLIENT TESTIMONIAL

"We selected MicroMD PM as our practice management solution after an extensive national search. On each crucial product point in our final selection process (price, client references, longevity in the market, scope of functionality in the base product, product support and ease of use), MicroMD PM was by far the best choice for our practice."

John Long, Practice Administrator
Diabetes & Endocrinology Associates

MicroMD PM does much more than maintain appointment histories. With its "Planned Visits" capability, you can log pre-authorized visits for a given procedure and/or diagnosis and monitor remaining eligibility over time. The system also interfaces with third-party lab systems to retrieve lab results. MicroMD PM presents order and results data in user-friendly displays.

Reduce Data Entry, Ensure Accuracy

MicroMD PM provides users with the ability to scan drivers licenses and health insurance cards using OCR (Optical Character Recognition). OCR technology electronically reads the license or insurance card, and extracts the data (address, subscriber information), so that your staff will not have to key it in. Use of OCR will improve the quality of data collected at the practice, reduce claim rejections and improve cash flow.

Usability Features

A wide range of usability features simplify day-to-day activities. MicroMD PM adds document images from a scanner or digital camera to patients' files to ensure availability of insurance details. For more flexible data retrieval, the system lets users define patient categories, track chronic diagnoses, store encounter-specific notes, and use a built-in transcription feature.

Leverage Patient Communication

MicroMD PM makes generating personalized letters, reminders, labels and other communications simple. But it can do much more. With automatic recall, for example, your staff can generate recall entries quickly, according to highly detailed criteria. When they prepare to send recall reminders to patients, they simply generate a report and print letters.

The screenshot shows a window titled "Patient Recall Report" with a document dropdown menu set to "Rec_1_recall_30.doc". The report is dated 06/28/2007 12:19 and is page 1 of 1. It is a "Recall Report" for "MICROSYS MEDICAL" covering the period "06/28/2007 To 12/31/2008".

Total Patient Recalls: 7

Powerful Patient Accounting Tools

MicroMD PM offers all the right tools to stay in control of billing. The system tracks patients' insurance effective dates and maintains histories of both bills and claims. MicroMD PM includes automatic account aging, customized dunning messages, and family billing.

MicroMD PM was ranked in the top 10 for the Practice Management category (2-5 Physicians) in the 2009 Top 20 Best in KLAS Awards: Software & Professional Services report. www.KLASresearch.com
